

Mira Finance

Building the Next Generation of Index Investments on Move

Why?

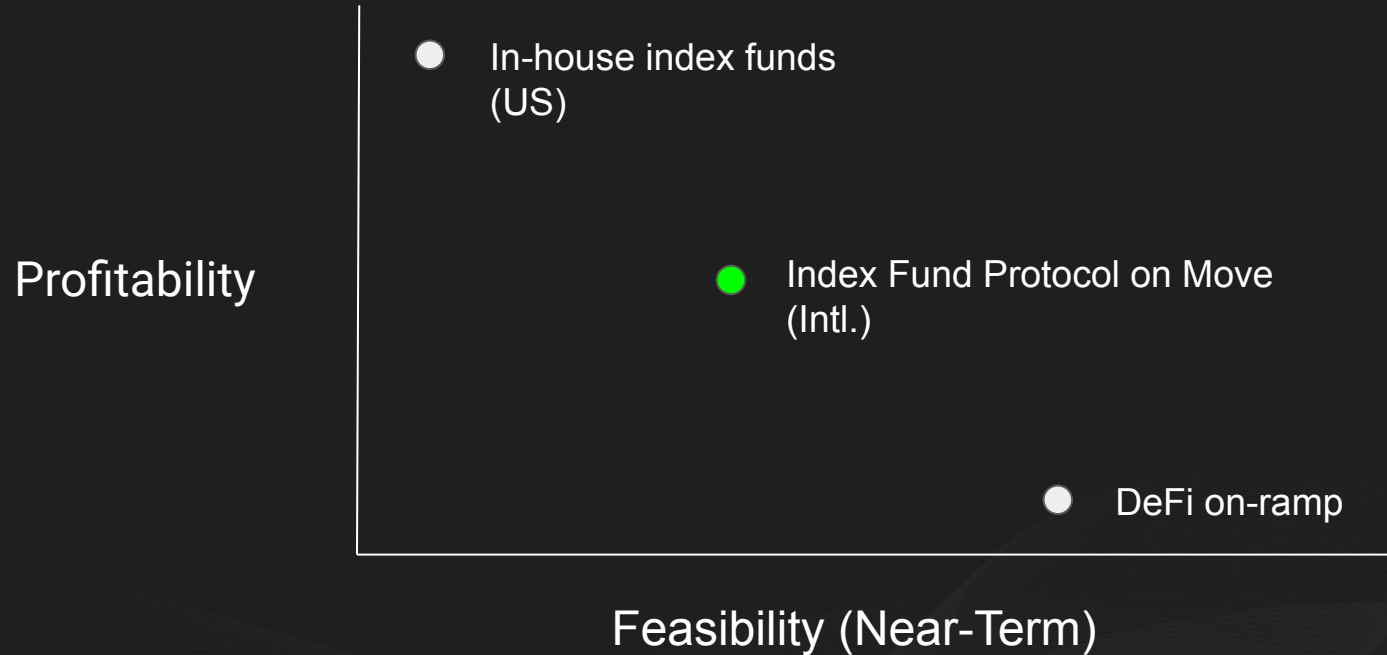

- Passive investing is necessary to onboard the early and late majority of investors.
- The future of asset management looks different - crypto, stocks, bonds, commodities, NFTs, real estate, playing cards, and more - will all be stored in one place.
- Interacting on-chain has high friction - UX should be chain agnostic, transaction confirmations should be built-in, and buying should take one click.
- Liquidity, and thus, utility, is fragmented across different chains.

What we do

- Expert cross-chain index funds
- Cross-chain investment management platform for individuals/institutions to create their own funds
- Integrate DeFi tools & unlock utility on 8+ chains
- Treasury management

Market Fit

Cross-Chain Indices

- Mira will provide capitalization-weighted indices consisting of 5-20 tokens available on Aptos, Eth, Solana, and other chains - using LayerZero and Axelar
- Indices will track projects in sectors ranging from Layer 1's, DeFi, Wireless, Web3, and more
- Weighted based on the value of each token's circulating supply

Investment Management Platform

1. Managers design a portfolio, strategizing with tokens from any chain.
2. Managers set a rebalancing period, management fee, privacy settings, whitelisting/KYC, and other options.
3. Managers publish their funds, inviting references and friends to invest. They compete on the leaderboard for recognition and rewards.
4. Investors can choose a fund by referral or by browsing the dApp. They can allocate capital in one click, depositing a token on any major chain through their supported wallet (Aptos Wallets, Metamask, Phantom, Coinbase Wallet, etc.)

More Than a Fund

Mira will act as an onramp to other DeFi products on Aptos with:

- Liquid Staking (Ditto Finance)
- Liquidity farming (Satay & Arco Protocol)
- Swaps / LPs (Pontem Network)
- Launchpad (Meeiro)
- Leverage (Tsunami Finance)
- Lend and Borrow (Superposition)
- Auto-investing (in house)

We are partnering with Stader Labs, Squid Swap, and others to offer all of these tools multichain.

Revenue Model

- **Transaction fees from our indices**
 - index tokens will have a 0.95% streaming fee
- **Platform Creation and Investment Fees**
 - managers and investors pay a 0.95% fee
- **\$MIRA Governance Token**
 - \$MIRA holders vote on smart contract upgrades, new products, treasury allocation, etc
 - Profits from composed indices are dist. in \$MIRA
 - Fund managers will be incentivized to add and hold \$MIRA
- **Payment for order flows to DeFi Partners**

Competitors

Competitor	Blockchain	Cross-chain index	Custom Index	DeFi On-ramp	TX Cost
Mira Finance	Aptos & Sui	✓	✓	✓	Low
INDEX CO-OP (DeFi Pulse)	ETH	✗	✗	✗	High
Arch Finance	ETH	✗	✗	✗	High
Hord Finance	ETH	✗	✓	✗	High
Dhedge	ETH	✗	✓	✗	High

Token Allocation

Roadmap

Q3 & Q4 2022

Product Development, Testnet & Feedback, Simulations, Completed Funding Round, and Series of Audits

Q1 2023

Mainnet Launch, Meta Governance, and Dapp Onramp to Other Protocols

Q2 2023

Public Token Launch and Social Media/Referral Rewards Incentivization

The Mira Platform

- Establishing cross-chain crypto indices to bring traditional investors and new entrants to DeFi
- Offering access to institutional investors through KYC/AML and compliance with the SEC and CFTC
- Organizing a community where users can exchange information, research cryptocurrencies, compete in performance, share, and manage their wallets

Bigger Picture

- We're working hard with law firms, consulting firms, and auditors to create the first compliant index protocol in the US.
 - We aim to release a regulated product, complete with AML, KYC, and adhering to the SEC and CFTC reqs in 6 mo. - 1y.
- We're looking at ways to incorporate NFTs and broader tokenized assets to prepare for the next wave of blockchain applications.

Team

Andrew Capasso

Co-Founder/ CEO

Former director of internal development at the American Blockchain Initiative - a lobbying firm educating US policymakers on cryptocurrency to improve regulatory clarity

Nirel Gershwind

Co-Founder/ CTO

Former SWE & REU Blockchain Researcher - implemented a Merkle DAG Blockchain as a novel solution for mobile wireless sensor networks

Alex Allaire

COO

Former Industry Affairs Associate at The Blockchain Association.

CEO of the American Blockchain Initiative
